Silent Gliss

hand operated curtain tracks

With 13 different Silent Gliss hand operated curtain track systems to choose from, we have the required track for any given specification. Regardless of surface, size, shape or colour we are able to provide the ideal system for any installation.

Hand operated curtain tracks can be bent for curved applications. Profiles are available for ceiling or wall fix.

Silent Gliss

cord operated curtain tracks

The Silent Gliss cord operated curtain track avoids the need to handle your curtains and easily controls heavy or inaccessible curtains.

A range of cord operated curtain tracks are offered to suit all requirements, from medium to heavy duty.

Cord operated curtain tracks can be bent for curved applications. Profiles are available for ceiling or wall fix.

Independent curtain operation

If curtains are particularly heavy, or there is a need to operate them independently, we can offer an intermediate pulley which cords the track at both ends for individual curtain opening.

Silent Gliss

electric curtain tracks

Silent Gliss lead the market for automated curtain track systems, offering the widest, most efficient and reliable range of electrically operated curtain tracks.

There exists a track designed for every level of application from the Silent Gliss 5090 Autoglide right up to the stage curtain system 5800.

Silent Gliss 5400 - for highest demands

Silent Gliss sets a new standard with its 5th generation of electric curtain track systems.

The fine-tuned electric curtain track systems 5400 and 5420 stand for unmatched silence, compactness, flexibility and design. High-performance and high-value are the guiding principles for Silent Gliss motorised tracks.

Silent Gliss

electric curtain tracks

Silent Gliss 5200

Perfect for the medium weight range, the electric curtain track systems 5200 and 5220 offer silent and precise operation, electronic end-stops and can be fully integrated in all kinds of building management systems due to the open design of the motors.

Silent Gliss 5090 Autoglide

This made to measure powered curtain system from Silent Gliss is ideal for simple domestic curtain applications. The choice of four system options allows you to operate your curtains automatically via a switch, a handset, a dawn to dusk sensor or a timer.

Silent Gliss

electric curtain tracks

Silent Gliss 6150 Electric Metropole

Electric curtain tracks need not be discreet, white profiles! Silent Gliss offer the option of 'upgrading' your track to a decorative pole!

By encasing the track in a pole fascia it is immediately transformed into a design statement. There is a choice of colours along with a range of decorative finials, midials and brackets.

Silent Gliss Manual Override Protection & Safety for your Electric Curtain Track System

This option, available for Silent Gliss 5090, 5200 and 5400, allows the curtain to be operated by hand without damaging the motor in the event of power failure and emergency.

Ideal for environments with a higher risk of damage through hand operation.

Silent Gliss

total control

Silent Gliss radio control systems allow remote operation without the need of complex wiring.

Operation possibilities

- Variety of hand held and wall switches
- Single or multiple channel solutions
- Daylight controlled operation with light sensors
- Timer function
- Remote control by SMS
- Home automation connectivity
- Smart phones and tablets (eg. iPhone and iPad) connectivity

Silent Gliss

wave & wave XL tracks

The reinvention of the Classic Curtain

Only a curtain from Silent Gliss can make waves whilst at the same time radiating tranquillity and harmony. It could be regarded as a design feature, the most beautiful contemporary curtain in the world.

Using a unique glider cord contained within the track and specifically designed finishing components, Silent Gliss offer two systems: The standard Wave as well as the extraordinary Wave XL for impressive big size applications.

A modern curtain heading system combined with a suitable fabric is guaranteed to be a real eye-catcher in every room.

Silent Gliss fabric collection

Whilst many fabrics are suitable for Wave, only when using Silent Gliss approved Wave fabrics can you be assured the perfect and even wave effect. By selecting one of our wider fabrics and limiting the number of joins, the highest quality curtain is achieved.

Fabrics supplied by Silent Gliss are mainly eco-tex certified and most are flame retardant. The well proven Colorama is offered in two transparencies, in 3m width and over 40 colours - perfect for Wave curtains.
